...for everyone

KINeTİK
healthcare for everyone

a whole new future in...

...health management

Kinetik was born from a single idea. That health monitors are not just for people with diagnosed conditions, such as Hypertension. Health monitors are for everyone – and if designed to be attractive, affordable and accurate – they can encourage regular checks on ‘wellness’ in every home. We believe prevention is better than cure. Vital sign knowledge from health monitoring is a first step which can transform the health and wellbeing of millions worldwide.

Kinetik works with its distribution partners to help achieve this vision. Just one of our affordable blood pressure monitors can achieve so much. It can help with the diagnosis of hypertension of an unsuspecting otherwise healthy individual; potentially keeping them from serious conditions later on. It can help people keep hold of their wellness through regular monitoring and taking early remedial action at the first signs of change. All of which can improve people's lives and save huge costs of medication and secondary care. As Kinetik grows, many new products are being added including expansion into treatments, using low level light therapy, as well as TENS digital pain relievers. All drug-free and non-invasive electrical alternatives.

Kinetik Design Registration

BPM1 (Blood Pressure Monitor)

20081016 - European Community Design Registration No.000992490-0003

20100113 - US Design Patent No.29/319,248

20090605 - Canadian Industrial Design Registration No.126314

BPM2 (Wrist Blood Pressure Monitor)

20081016 - European Community Design Registration No.000992490-0001

20100326 - US Design Patent No.29/319,246

20090601 - Canadian Industrial Design Registration No.126312

IET1 (In Ear Thermometer)

20081016 - European Community Design Registration No.000945985-0002

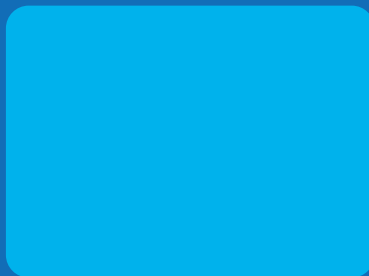

20090505 - US Design Patent No.D589,823

20090714 - Canadian Industrial Design Registration No.126310

BCM1 (Body Composition Monitor)

20081016 - European Community Design Registration No.000945985-0004

20081016 - Pending US Design Patent Application No.29/319,249

T1 (TENS Machine Digital Pain Reliever)

20081016 - European Community Design Registration No.000992490-0002

20100113 - US Design Patent No.29/319,247

20090616 - Canadian Industrial Design Registration No.126313

S1 (Stepometer)

20081016 - European Community Design Registration No.000945985-0001

20090724 - U.S. Patent No. Des.595,166/Patent No. Des.595,166

20090609 - Canadian Industrial Design Registration No.126309

(Forehead Thermometer)

20081016 - European Community Design Registration No.000945985-0003
